

SPOTLESS RINSE

RINSE AID

TECHNICAL INFORMATION GUIDE

DEFINITION: Powerful Liquid Surfactant which accelerates the elimination of water.

COMPOSITION: Water, drying agents, moisturizers and conservatives.

With excellent chemical drying properties that facilitates the rapid evaporation of water accumulated on the dishes during the washing process.

Washing while descale the machine itself, removing all adhering to calcification deposits on interior walls, pipes and pinwheels accumulated by the use of products with high contents of sulfates, phosphates and carbonates, contained in the same process water.

It works perfectly with high water temperature but its formulation is designed to work in temperatures below 50 degrees Celsius, thus avoiding the mandatory use of boilers or equipment "Boster" type.

DIRECTIONS: On machines with modern technology-oriented low-water the dosage can vary between 5.2 ml to 10.4 ml per wash cycle depending on water hardness, type of fat used and quality pre-washing (waste disposal of foods with high water pressure in the racks).

PACKAGING: 3.5 liters (.925 gallon), 19 liters (5.01 gallons) & 200 liters (52.83 gallons).

PROPERTIES

Appearance	Liquid
Scent	Characteristic
Color	Transparent
Flammability	Not Flammable
PH	6.5 to 8
Density	1,000 to 1,010 g/ml
Flash Point	N.A.

Biodegradable
